

# Internships & student placements

Interns and student placements need guidance and your commitment to our students is vital for their learning. It is important that there is appropriate mentoring during the internship/placement and you clearly communicate the aims and expectations of the program. It is essential that there is a quality professional learning program in place.

## Green sprouts

## School of Education

The Early Childhood Program requires students to undertake a community engagement project. The students not only provide a meaningful service, but simultaneously learn about interacting with people from a wide variety of social and cultural backgrounds.

## **School of Health & Science Bachelor of Natural Science final year Field Project**

Students in their final year of the B.Nat.Sci degree are required to undertake a 'real world' project for a professional or community client in their area of study (Animal Science, Environmental Health/Management or Sustainable Agriculture and Food Security). The students need to develop a project proposal in line with the client's needs and develop a professional student-client relationship. The students will then present their results to the client orally & written report in October.

## **The Academy**

Academy Travel grants applications open twice a year for Academy students to apply for funding to undertaking a local or international study opportunity or conference.

## **The Academy's Global Leaders Program**

A University-sponsored overseas academic or leadership experience  
A guaranteed internship during your studies  
Advanced study of global citizenship, democracy and social change

## **School of Management**

Marketing

Tourism & Urban Planning

Tourism Management

400 hours of supervised work experience

*Vinnies using marketing students*

*Final year marketing students in Western Sydney's university school of Business are compiling marketing plans for Vinnies Western Sydney as part of their capstone marketing unit: Marketing Planning Project.*

*This allows the students to get practical working experience and industry skills while Vinnies benefits from the marketing plan for their future marketing strategy produced by young talented up and coming professionals.*

## **Bachelor of Sustainable Agriculture and Food security**

In the final year of study, students will undertake a real-world project for a professional client.

## **Bachelor of Social science (Heritage & tourism)**

industry placement

## **Bachelor of building design management**

1200 hours of industry-related employment prior to graduation.

## MakerSpace – SCEM

The MakerSpace facility is offered by the School of Computing, Engineering & Mathematics. It is an open public workshop which offers equipment, advice and expertise to help make your idea a reality.

Facility locations:

**Parramatta campus** Room G.06 building EB, Wednesdays 1pm-6pm

**Kingswood campus**, building Z, Thursday 1pm-6pm.

The MakerSpace also offers engagement opportunities to the wider community, including; students and teachers, industry and general community members in the areas of:
