

Recording MP3s from YouTube

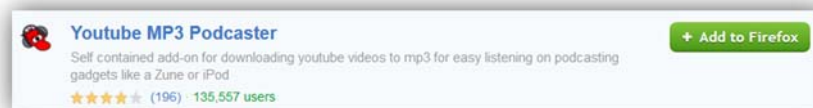

This program works better in the **Firefox** browser.

- Install **Firefox** and open it.
- Make sure the **Menu** is showing.
 - If not, Right mouse click under the **Address** bar and choose **Menu Bar**.
- From the **Tools** menu, choose **Add-ons**.
- Click the **Get Add-ons** button.
- In the **Search** box, type **YouTube MP3 Podcaster** and press **Enter**.

If you can't see it, choose **See all ### results** (at the bottom)

- Locate **YouTube MP3 Podcaster**

- Move your cursor over the name to show the **Add to Firefox** button
- Click the **Add to Firefox** button and Click **Install Now**.
- Close and re-open Firefox
- Open YouTube and the Podcast Icon appears in the top Toolbar.

Using YouTube.

- Locate the song you want to record and play it. (you may need to wait for an add)
- Click on the **Podcast** Icon (probably located top right of the window)

- Choose the option that contains the acronym **.mp3**
- The **Save As** box appears, choose the Location and give it a Name.
- Click **Save**.
